

**Anglebase**

Innovative solutions for agriculture and industry

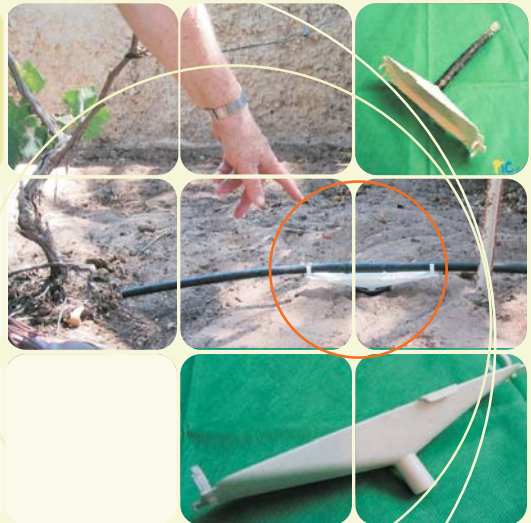

Patent PCT

**Irrigate correctly!**
**Irrigate straight to the roots, through the funnel!**
**Water and fertilizers to the exact place, directly to the soil in between two plants!**

- **No waste** – insignificant exposure to the sun and wind.
- **The water and fertilizers are always in the right place** – in the right amount.
- **It is very easy to add nutritive materials or fertilizers that are not transmitted through drip irrigation** – directly into the root system.

**Suitable and economic to implement:**

- In plantations, greenhouses, soiless culture, in open field, in orchards, vineyards and gardens.
- In vegetables, flowers, orchards and gardens.
- **In feeding pillows**, feeding channels and in any type of soil
- No sprouts of herbage.
- No stimulation of diseases in the root neck.
- No vaporization of the ground.
- No mud.
- No spraying of recurrent herbs.
- No saturation of the system.
